

I have been peculiar and so far as visiting
Washington to make drawings is concerned I
shall not be able to do that again very soon - a
very skilful artist is now preparing human
figures and I think the whole thing will
be very respectable and do great good. Should
this succeed it must be our aim often to get
up such things to interest and deepen the
feeling of the humane. The truth hate our
pictures because they speak and give the action
of truth, not because they exceed it. We must
be lavish of truth in such impressive forms.
The laceration of Draper which we have got for
the Record will produce a fine effect. -

What a noble Liberator we got this week - Garrison
& Thompson's articles will do great good.
They sh^d be widely circulated. I hope Mr.
Phelps is in better health. Please to remember me
affectionately to her and to Dr. Porter & family.

Yours Affec^t Brother
Hornor

We have had an affecting death
in my family - the colored young
woman brought up by us 18 years of age.

She died in faith & hope on Sabbath last having been
a disciple ^{of Christ} and very devoted about 18 months. I shall prepare
some acct. of her for the Liberator.

Rev. A. A. Phelps

Dear Brother

I regret much for getting to speak to brother Wright for the manuscript on Dis. Col^a early - It has been sent to Pres. Green who needed it for some purpose. The picture of slavery in the Dis. Col^a is going on well and as soon as is expedient I think should be published. Mr. L. Tappan showed me your remarks on the subject. On acc^t of Mr. Crandall it may be well to hold it back a little but it should be spread over the nation and sent to Congress men probably next month. - A very sensible effect may be effected upon Congress this session but the nation can now be moved so as to affect public men in their election and policy at another time. As it regards occasions of excitement we need not fear any want of new occasions of public interest on this subject, and I would therefore not advise keeping this on hand for another year. The difficulties of getting up this work
